**11. Description of proposed works:**

The majority of works required have been completed. All wells, pumps, electrical, and pipelines have been installed and are currently being used for irrigation. Additional pipelines and meters will be installed in order to better manage the irrigation of the place of use.

**15. Provide a detailed description of the proposed project and its water usage:**

Change application to the following eleven St. Clair water rights are being filed simultaneous.

Permit	Certificate
14670	5371
14725	5014
17029	5372
17758	6837
22177	7570
27809	8258
27810	8259
27811	8260
28623	9256
58879	16112
64625	Permit

Combined duty for these rights [per NDWR spreadsheet attached] is for 1088.84 acres . 134.97 acres of sole source groundwater of Permit 17758 is at 2.702 acre feet per acre [364.87 acre feet per certificate 6837] The remaining 953.87 acres have a combined duty not to exceed 4.0 acre feet per acre or 3,815.48 acre feet. The total combined duty for these 11 rights should be 4,180.35 acre feet.

A portion of 14670 [prime] and portion of 22177 and 17029 [corresponding supplemental] are not being transferred as part of these series of applications. 37.73 acres at 4.0 acre feet per acre [150.92 acre feet] are not part of these transfers and are identified in temporary permit 83635T. Therefore the combined duty of the eleven change application being submitted should be 4,029.43 [4,180.35 AF - 150.92 AF]. It is requested that the combined permit terms allow the irrigation of 1007.36 acres of land within the place of use at 4.0 Acre feet per acre. It is anticipated that this water will be co-mingled and used anywhere within the place of use.

A portion of the place of use will be land acquired through the US Desert Land Entry Program and a portion is land owned by the applicant.

**16. Miscellaneous Remarks:**

Report of conveyances are being prepared to change the NDWR ownership records from Rodney and Virginia St. Clair to Rodney St. Clair due to the recent death Virginia St. Clair.
